

Digital products for better life

www.bart.sk/en

Partnering for digital success

Our mission is clear - to create digital products that improve our lives.

For more than 27 years, we've been developing web solutions to empower businesses and bring value to their customers. Situated in Košice, a city known for its thriving IT scene with over 15,000 specialists, we have a strategic advantage. As part of this dynamic landscape, we're constantly inspired by innovation and expertise, ensuring that our solutions remain at the forefront of industry trends.

At our core, we believe in building long-lasting partnerships that are based on trust, transparency, and mutual success.

Our services

Tailored eCommerce Solutions

Building tailored online stores is our main area of expertise. With our practical knowledge of latest technologies and industry best practices, we drive success in both B2B and B2C domains.

Agile Software Development

Our team specializes in crafting custom digital products that resonate with today's market demands. From innovative applications to user-friendly platforms, we tailor solutions to meet the unique audience needs.

Transformation of Existing Solutions

Whether it is optimizing existing solutions or building them from the ground up, we know how to step in. With careful analysis and strategic improvements, we pave the way for enduring success.

Cloud Platforms

Google Cloud Platform, Amazon Web Services

Strategies for innovation

Agile development

To us, being agile is about embracing change, fostering transparent collaboration, and continuous improvement.

Application Monitoring

With a proactive approach to monitoring, we can detect potential issues early, ensuring uninterrupted performance.

QA Automation

Using test automation, we ensure thorough evaluation of our software's functionality in various scenarios.

Continuous integration and delivery

Embracing principles of CI/CD, we optimize our workflows, ensuring heightened efficiency, speed, and reliability.

Data-driven decision making

Leveraging advanced BI and data analytics tools, we have essential insights to propel businesses forward.

AI innovations

Through the range of AI solutions, we optimize processes, personalize customer experiences, and enhance competitive advantage.

65+

DR. MAX

Ecommerce solution

With more than 2.100 pharmacies, Dr. Max is one of the largest pharmacy chains in the Central Europe. It is the leader on the Czech, Slovak and Romanian market and also holds a significant role in Poland. Italy, Serbia, Bulgaria and Hungary are among its markets with strong growth potential. Penta's goal is to expand the project both in the current markets and in the Southern and South-eastern Europe.
